

Mass Loaded Vinyl

The mass loaded vinyl is produced with environmentally friendly and harmless raw materials. It is moisture-proof, corrosion-resistant and mildew-resistant. Since the mass loaded vinyl has good tensile performance, which makes the installation convenient and quick. Moreover, the higher areal density brings superior sound insulation performance, which effectively suppresses the propagation of mid and low-frequency sound waves.

Specifications

Material	PVC, etc.
Thickness	1.2mm, 2mm, 3mm
Dimensions	1m x 10m, 1.2m x 5m/ roll
Weight	2-5kg/m ² or 10kg/m ²
Customization	Thickness: 1.2-5mm Width: 1.3m maximum Length: 10m maximum (advise)

Applications

Mainly used in the construction industry, conference rooms, factories, multi-function halls, KTV rooms, pipes (water pipes/wind pipes) and offices where noise reduction is required.

Sound Insulation Performance
